CHANDANA VANGA

Full Stack Developer | Hyderabad, Telangana 500055
+91 9381868901 | chandana.vanga.04@gmail.com

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4+ years of experience developing scalable web applications using Angular, C#, .NET Framework, ASP.NET Web Forms (ASPX), DevExpress UI Controls, Oracle and PostgreSQL databases. Proven track record in building responsive user interfaces, RESTful APIs, and optimized database solutions. Expertise in Agile development methodologies, version control systems, and cross-functional collaboration. Strong focus on clean code architecture, performance optimization, and delivering high-quality software solutions that meet business requirements.

CORE COMPETENCIES

Languages	C#, JavaScript, TypeScript, SQL, HTML5, CSS3
Frameworks	.NET Framework, ASP.NET Core, Angular 14, Entity Framework, ASP.NET Web Forms, DevExpress UI Controls
Frontend	Angular CLI, HTML5, CSS3, SCSS, Bootstrap, Responsive Design, Cross-browser Compatibility
Backend	RESTful APIs, Web Services, API Integration
Databases	Oracle Database, PostgreSQL, SQL Server, Stored Procedures, Functions, Database Design
Tools	Visual Studio, VS Code, Toad for Oracle, Git, GitHub, TFS, Figma, MS Office
Methodologies	Agile, Scrum, Test-Driven Development, Code Review, CI/CD
Other Skills	UI/UX Design, Performance Optimization, Debugging, Technical Documentation

PROFESSIONAL EXPERIENCE

Application Developer (App-3) : Oracle India Private Limited, Hyderabad, Telangana | *June 2025 – Present*

Project: Insbridge

Technologies: ASP.NET Web Forms (ASPX), DevExpress UI Controls, C#, ADO.NET

Oracle Insbridge is a specialized insurance industry solution enabling companies to develop, manage, and deploy complex rating and underwriting rules, improving pricing and accelerating time-to-market for new products.

- **Web Forms Development:** Built interactive ASP.NET Web Forms (ASPX) applications using server-side controls, ViewState, and event-driven programming.
- **DevExpress UI Components:** Developed responsive UIs using DevExpress GridView, DataGrid, Reports, and TreeViews with conditional formatting, filtering, and export options (Excel/PDF).
- **Backend Integration:** Integrated ASPX modules with C#, ADO.NET, and stored procedures for secure and optimized data operations.
- **Validation & Input Handling:** Added client-side and server-side validation using ASP.NET Validators and DevExpress validation tools.
- **Legacy Modernization:** Enhanced and refactored legacy ASPX modules to improve UI performance and maintainability.
- **Cross-functional Collaboration:** Worked closely with QA, BA, and backend teams to ensure accurate and stable UI delivery.

Software Developer (App-2) : Greater Than Educational Technologies, Hyderabad, Telangana | *April 2023 – May 2025*

Project: OQB – Online Question Bank

Technologies: C#, .NET Framework, Angular 14, Oracle, Bootstrap, HTML, CSS

An educational platform streamlining question paper generation for institutions with comprehensive user management, efficient question categorization, and customizable paper creation for admins, teachers, and students.

Junior Software Developer (App-1) : Greater Than Educational Technologies, Hyderabad, Telangana | *December 2021 – March 2023*

Project: nConnect

Technologies: C#, .NET Core, Angular 14, PostgreSQL, HTML5, CSS, SCSS

A comprehensive mobile and web application for Narayana Educational Institutes facilitating seamless communication between staff, parents, and management. Includes real-time bus tracking, attendance monitoring, exam results, announcements, and a staff ticketing system.

- **Frontend Development:** Developed responsive web interfaces using Angular 14 and Angular CLI, implementing component-based architecture with custom directives, services, and reactive forms validation.
- **Backend Development:** Architected scalable backend solutions using C# and ASP.NET Core, designing and implementing RESTful APIs for seamless frontend-backend integration.
- **Database Management:** Created and optimized Oracle database schemas, stored procedures, functions, and packages to improve data retrieval performance by 40%.
- **API Development:** Built secure RESTful web services enabling real-time data synchronization between frontend applications and backend systems.
- **Code Quality:** Maintained high code quality through Git version control, code reviews, and following industry best practices for scalable software architecture.
- **Testing & Deployment:** Implemented comprehensive testing strategies and deployment procedures ensuring 99.9% application uptime and security compliance.
- **Agile Development:** Actively participated in Agile/Scrum ceremonies including daily standups, sprint planning, and retrospectives, consistently delivering features on schedule.
- **Performance Optimization:** Optimized application performance through efficient database queries, caching strategies, and frontend optimization techniques.

EDUCATION

Bachelor of Technology | Sreenidhi Institute of Science and Technology, Hyderabad, Telangana | **2022**

KEY ACHIEVEMENTS

- Successfully delivered 15+ features within scheduled timelines using Agile methodology
- Improved code reusability by 50% through implementation of modular component architecture
- Achieved 99.9% application uptime through robust testing and deployment practices

LANGUAGES

English: Professional Working Proficiency | **Telugu:** Native Proficiency
